User Registration form with WPF and Custom Controls

Create a user registration form using the given interface design. Follow the instructions below for implementation:

1. Form 1 (Registration Form):

- The form 1 should include labels and text boxes for the user inputs.
- The form should have a "Register" button. Upon clicking the "Register" button, **Form 2** should appear.
- The appearance of all the text boxes & all labels should follow a common theme, which should be consistent across all text boxes & labels in the form.

2. Form 2 (Display Form):

- This form should display the data gathered from Form 1.
- Each data field should have an appropriate label, and the data field should follow a common template to maintain a uniform look.

3. Button Design:

- The "Register" button in Form 1 and the "Close" button in Form 2 should have a consistent appearance, maintaining a common theme throughout both forms.

4. Custom Control Creation:

- Apply the custom control creation concepts we discussed to ensure all text boxes, labels and buttons in the forms are well-arranged.
- Make sure the text boxes and labels are neatly aligned with proper padding, margins, and font styles to create a professional look.

The screenshot shows a web browser window titled 'User Registration'. The form contains the following fields and options:

- Title: (dropdown menu)
- First Name: (text input)
- Last Name: (text input)
- Address: (text input)
- Postal Code: (text input)
- Gender: ☐ Male ☐ Female
- Membership: ☐ Member ☐ Non-Member
- Register (button)

Handwritten red annotations include a large circle around the first four text input fields, an arrow pointing from the bottom left towards the center, and three asterisks (*) placed near the bottom of the form.

Form 01

The screenshot shows a web browser window titled 'Registra' (partially visible). The page displays a confirmation message:

Registration Successful!

Below the message, the registered user's details are listed:

- Title: Ms
- First Name: Jane
- Last Name: Doe
- Address: LawrenceTown
- Postal Code: 2345
- Gender: Female
- Membership: Member

Handwritten red annotations include a large circle around the entire list of user details, an arrow pointing from the right towards the 'Address' field, and one asterisk (*) placed near the arrow.

Form 02

Submission Instructions

1. **Complete your project** and ensure all required functionalities are implemented.
2. **Prepare brief documentation** (maximum **2 pages**) that includes:

- **Screenshots** of your working program.
 - **A simple explanation** of the functions and event handlers you used.
3. **Submit your work on Brightspace** by uploading:
- A **zipped folder** containing your **complete project files**.
 - The **documentation file** in PDF or Word format.

Marking Criteria – 20 Marks

Criteria	Marks	Description
Custom Control 1, Form 1(Labels Design)	4 marks	- Proper design and implementation of the first custom control - The custom control should be consistent with the overall theme and display data correctly.
Custom Control 2 , form 1(Text Box Design)	4 marks	- Proper design and implementation of the second custom control (e.g., text box for Email). - The custom control should be consistent with the overall theme and display data correctly.
Custom Control 3 (Button Design)	4 marks	- Proper design and implementation of the custom button control (e.g., "Register" button). - Button should have a consistent theme and functionality.

Custom Control 4, Form 2 (Label Design)	4 marks	- Proper design and implementation of the custom label control (e.g., label for Full Name, Email).
Proper Registration & Use of Custom Controls	4 marks	- Correct usage of custom controls in the application. - Include explanations and proper documentation of custom control design and implementation

Learning Objectives:

1. Demonstrate an understanding of Windows application programming using .NET.
3. Develop an application architecture utilizing best practice design.
